

Native Plant Kid Quest

What color flowers have you seen today?

Did you see any pollinators such as bees or butterflies visiting a plant? What were they doing?

How many new textures did you experience? Were they prickly, smooth, or moist?

Did you smell any new smells today? How would you describe them?

What new sounds did you hear?

Do you have any plants in your garden at home that look like any of the plants you saw today?

Did you see any plants you want to add to your own garden? What did they look like?
