

Questions to Ask Our Gardeners

*Want to ask our native plant gardeners some questions but not sure where to start?
Here are some questions to get the conversation going!*

How long have you been gardening with native plants? What do you like about them?

What is your favorite native plant and why?

Besides planting with native plants, what do you do in your garden to help the environment?

Do you have a favorite season in your garden? If so, which is it, and why?

If you don't grow them yourself, how do you like to acquire your native plants?

Did you start with a design in mind, or did you just plant what made you happy?

If you were giving advice to someone who is just getting started with native plants, what advice would that be?
